Scholarships for excellence in undergraduate studies

The Research Foundation of Lappeenranta University of Technology has decided to establish a scholarship programme to reward excellence in undergraduate studies. The foundation plans to award a maximum of twenty scholarships worth 1000 euros each to students based on applications.

The scholarships are primarily awarded based on excellence in studies (average grade at least 3.8), but other factors will also be considered, such as participation in international student exchange and research, number of credits completed yearly. The application is to include the number of credits completed, the average grade of courses, the student's field of study and year of studies, the number of semesters as an attending student, and possible publications. The applicant should have at least 100 credits completed at LUT (exception – Master's degree students at least 80 credits)

The scholarships are applied for by filling out a form ("Excellence in undergraduate studies"), which is available on the foundation web site www.lut-foundation.fi.

Scholarships will be revealed in annual gala of the Foundation in December.

The completed and signed form, including appendices (transcript of records), must be submitted

- **by Thursday, 4th November 2021 at 16.00 to mail box** of the Foundation (Building 6, office 6329) or LUT-yliopisto ja ammatillisen koulutuksen tukisäätiö, PL 20, Yliopistonkatu 34, 53851 Lappeenranta.
- The form must also be **e-mailed as an Excel file to Managing Director Timo Alho by 4th November 2021.**
